## **Afterschool Enrichment Program**

**Ages 5 years old to 12 years and 11 months**

There is a \$75 non-refundable registration fee.

Champion Early Learning Center Afterschool Enrichment Program is part of a licensed childcare program. Our philosophy is learning through play, and we offer several fun activities to keep our school age children engaged in learning while having fun. As a part of our afterschool enrichment program, we offer Tutoring and Homework assistance in a safe and nurturing environment. Our hours of operation are before school, after school, during school closures, spring breaks, winter breaks and some holidays. When school is out, we are in!

Our childcare center uses the STREAMin<sup>3</sup> curriculum which integrates the five Core Skills and six STREAM skills that form the building blocks for later learning and that prepare children for success in kindergarten and beyond. While this curriculum is designed for children from birth to five years of age, our school age children benefit from it as well. Our Afterschool Enrichment Program fosters social and emotional growth by creating a sense of belonging in a diverse and academically enriched community through the STREAMin<sup>3</sup> curriculum. This builds confidence in our school agers and improves social skills, which is extremely important for children in this age group. One of the many reasons we have chosen this model as our primary curriculum is because it increases creativity, critical thinking, and problem-solving skills. It encourages children to think about what they're learning and to be able to apply it practically in their everyday lives as well as academically. This style of learning enables school age children to develop the life skills needed to navigate the world around them.

As our enrichment activities are educational as well as fun children benefit from our STREAMin<sup>3</sup> curriculum through our weekly activities:

Mondays – Math Games – math and engineering

Tuesdays – Arts & Crafts - art

Wednesdays – Technology – using technology in learning

Thursdays – Baking & Cooking Classes for Science

Fridays – Free play

We have continual open enrollment and a summer camp program during the summer months. We accept several subsidies in addition to private pay families. We look forward to trying to make the world a better place, one child at a time.
